Skills

- Javascript / Typescript
- React
- Node.js
- Kubernetes (basic)
- AWS (IAM, EC2, EKS, ECS, S3, ..)
- C#, C++ (basic)

Language

- Turkish (Native)

My Projects

Bomchess (Chess Website)

A fully functional chess website I developed using Node.js, React and MongoDB.

Nora (Smart Note Taking Website)

A smart note taking website which alerts the user at specific intervals while also allowing grouping notes into fields.

The source codes and and live demos of the projects can be found in my GitHub.

Experience

Jr. Fullstack Developer

Prime Modality - July 2023
- Built Next.js (React) / TypeScript frontend using a template
- Designed and built backend API using Node.js and MongoDB
- With the usage of Terraform, built a staging environment at AWS EC2 along with a CI/CD pipeline using Jenkins.

Jr. Kubernetes / AWS Architect

Prime Modality - August 2023
- Built a development environment for a web app in Kubernetes using Minikube and Skaffold
- Deployed the product to AWS EKS using Terraform

Education

Duzce University Computer Engineering
Graduation Date: 2023, October
